Fusion Managed IT's Search for 3rd Party Data Center

Fusion Managed IT was in search of a 3rd party colocation data center with the goal to avoid additional expenditures to achieve their requisite data center certifications, compliance and uptime standards. The cost of maintaining a SOC 2 compliant on-premises data center in addition to the space required for their growing needs became unmanageable. By partnering with DartPoints the Fusion team has freed up time to focus their time and effort on delivering the value added services that are most important to their clients.

Up Time

Required 99.99% industry standard up time with competitive SLA

Data Location

Wanted a data center partner local to Greenville

Compliance

Needed to maintain SOC 2 compliance

Cost

Required capital reduction while maintaining business standards of service

The Solutions

DartPoints provided Fusion Managed IT with a secure colocation space, redundant power, and a multi-carrier-protected internet solution in nearby Greenville, South Carolina. This data center is SOC2/Type 2 certified and serves as a support hub for Levels 1 through 4 technical resources. DartPoints technicians and specialists maintain numerous certifications across disciplines ranging from Security and Compliance to Network Operations and Software Systems.
